

OVATION
Managing Mobility and More

Keeping Projects Moving

Construction

USE CASE

A **national construction company** with over 10K employees, 400 locations, 1,500 motor vehicles plus rail assets and over 7,000 mobile devices.

In construction, **if mobile devices are not working properly for crews, it costs time and money** for the company when jobs are at a standstill.

A **full optimization and audit of wireless expense billing** is crucial as a stepping-stone to gain control and **maintain tight delivery schedules**.

WHY OVATION?

OVATION has been providing Managed Mobility Services for business of all sizes for **over 20 years**. Our **unmatched carrier domain experience** along with our **track record of solving complex wireless mobility problems** allow us to help businesses keep moving forward.

CHALLENGES

The construction company had over 50 wireless billing accounts on multiple carriers that were not taking advantage of pooled data and needed help consolidating the billing. They also needed help with coding the wireless bills for their Accounts Payable Reporting. Internal resources were limited and each location managed the devices differently.

OUR SOLUTION

OVATION consolidated 50 wireless billing accounts down to 4 accounts, provided an audit/optimization on carrier/contracted rate plans. We optimized all voice, data, features and provided monthly dashboard reporting to managers. After billing was under control, OVATION assisted with the day-to-day tasks and handled all the support of the employees' devices to keep all construction projects moving forward.

THE RESULT: \$8 MILLION SAVED

- Consolidation of accounts
- Ongoing control of wireless expenses
- Visibility of usage with Dashboard Reporting
- Accounts Payable Reporting
- Saved 34% on initial audit
- Have saved another \$7 Million for ongoing management
- No downtime for employees at job sites because they always have working devices
- Alleviated admin time to manage thousands of devices
