

OVATION
Managing Mobility and More

Improving Staff Communication

Education

USE CASE

A **public land grant university** with over 4K employees, and over 1K mobile devices leveraging mobile devices for staff and campus communications.

In education, providing connected devices to professors, administrators, public safety and in some cases the students, helps keep staff connected, students engaged and assists in safety response plans.

The need for **rate plan optimization and visibility through reporting on usage and consumption** was crucial due to increased demands for mobile devices, budget pressure and disaster response plans.

WHY OVATION?

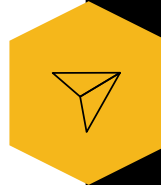

OVATION has been providing Managed Mobility Services for business of all sizes for **over 20 years**. Our **unmatched carrier domain experience** along with our **track record of solving complex wireless mobility problems** allow us to help businesses keep moving forward.

CHALLENGES

Balancing the wireless needs of multi disciplined departments and their tight funding was an ongoing challenge. The university had limited expertise on managing wireless expenses and providing visibility on usage and costs throughout the campus.

OUR SOLUTION

OVATION provided an audit/optimization on wireless rate plans. We optimized all voice, data, features and provided monthly dashboard reporting to all departments. After billing was under control, we assisted with the deployment of mission critical student devices during the pandemic, supporting distance learning while staying within budget.

THE RESULT: 36% SAVED or \$289/DEVICE

Our initial optimization delivered 36% in savings equalling an average annual reduction of \$289 per device. Ongoing optimizations/reporting allowed the university to support distance learning for students without access to Wi-Fi during the pandemic.
